PRODUCT DESCRIPTION

The FBT VENTIS 206A has been designed to meet the highest standards in both performance and aesthetic appeal. The FBT VENTIS 206A can be deployed as a front fill, an under-balcony fill, as a main providing pristine speech intelligibility or simply as the full-range companion of a subwoofer. The FBT VENTIS 206A incorporating 2 x 6.5" LF woofers with 1.5" voice coil, custom made for FBT and 1" exit throat B&C HF compression driver with 1.4" voice coil; a fully rotatable constant directivity horn ensure accurate coverage (70° H x 50° V). With a frequency range from 70Hz to 20kHz the FBT VENTIS 206A speaker provide high fidelity sound for both speech and music applications with a maximum SPL of 131dB. Low frequencies are driven by a highly efficient 700W RMS (full bridge) Class D topology, operating with extremely low THD; for the HF stage, a 200 W RMS performance is delivered via a meticulously crafted Class H/AB design. DSP on-board is both user friendly and powerful; a total of 6 pre-optimised settings are available, plus 2 further slots for users to form their own designs, using 5 parametric equalizers per slot. Constructed in 0,47" birch plywood, the FBT VENTIS 206A has an integrated rear handle. The optional mounting bracket allow the FBT VENTIS 206A speaker to be surface mounted on walls or ceilings.
